

NINJA-P Update

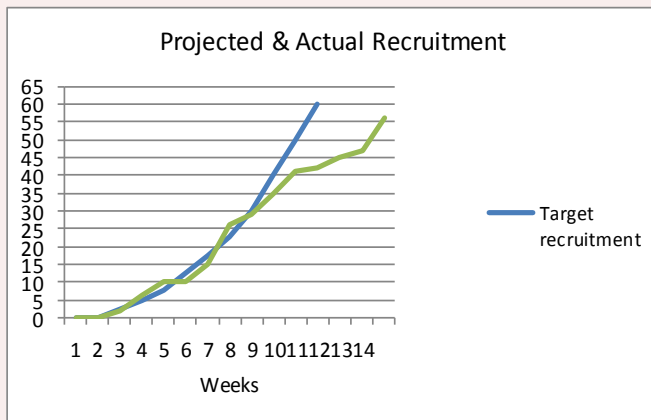

July 2015

56 patients now recruited!

The final countdown is on to complete recruitment for the NINJA-P study

We hope to finish recruitment by the end of July 2015

Well done to everyone involved in NINJA-P for all of their hard work

Recruitment

Recruitment slowed in June. On 18th June, the team in Mid-Essex hit their site recruitment target of 15 patients, and have been storming ahead with recruitment since. Hull and Guys and St Thomas' have been in constant competition, with Hull just beating Guys and St Thomas to recruit the site target by just one day. Well done to the all of the recruiting teams!

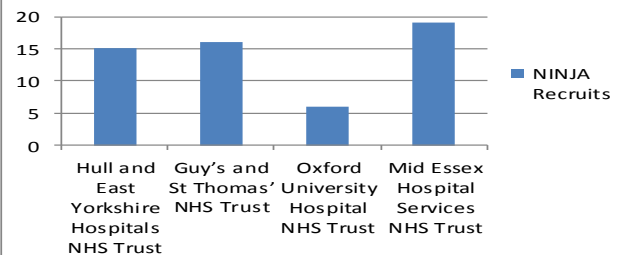

NINJA-P Top Tip: With the summer holidays starting, please remember to try and schedule a patient's follow up for a time where the parents will be able to bring them back in! The window for 2 week follow up is 10 to 20 days and for the 30 days follow up is 25 to 40 days!

Data Entry

Enter all data onto OpenClinica ASAP

- SAE and Change in Status need recording also.
- Remember to also send patient details forms and consent forms to Oxford

NINJA Recruits

Screening Logs

- Please remember to send all screening logs to ninja@ndorms.ox.ac.uk at the start of each month.
- These are essential for the study team
- We will use them to inform the design of the full NINJA study.
- So far, only limited screening log data has been returned.
- Certain trends have been picked up
 - Parents want surgeon to decide treatment
 - No weekend staff cover
 - Language issues causing ineligibility
